## EXPERIENCE

---

### Mern Stack Developer Intern

Entri-Elevate, Kerala

Nov'23 — Apr'24

#### Project-1: BookMyCourt App

- Created a BookMyCourt app where user can go through the Website and select Court available for booking.
- Used React as a frontend frame work and Node.js, Express.js as backend and MongoDB as the database for project.
- Implemented Login functionality and added authentication using JWT token.
- There is admin functionality where admin can login to website and add new courts.
- Integrated Razorpay for the payment.
- Implemented Redux for state management.

Tech Used: React, Redux-Toolkit, HTML, CSS, React-Bootstrap, Razorpay, React-Toastify, REST, Axios, MongoDB, Git, Node.js, Express.js, React-Tooltip.

#### Project-2: Restaurant App

- Created a static restaurant website using HTML, CSS, Bootstrap and Javascript.
- Created Navbar using which user can move to the required section.
- Designed Menu details which add value to the website.

Tech Used: HTML, CSS, Javascript, Bootstrap.

### Software Engineer

Feb'22----Dec'22

HCL Technologies pvt ltd

- Worked as a software Engineer on a “Pre-Production Monitoring Europe Bridge” in Nestle Project.
- Timely basis correction Process chains and closure of mails.

Tech Used: SAP BW
